RE: Mike Harman Jr.
Plattin Creek Excavating

Letter of Reference

Over the last 4 years we have had the pleasure of working with Mr. Harman and the employees of Plattin Creek Excavating on 5 different multi-family private developments (~244 units), from pre-bid to completion. These projects had an extensive amount of excavating, storm and sanitary sewer, domestic and fire water services, retaining wall erection, finish grading, and demolition. Plattin Creek has done a very good job and we would have no hesitation in using them again on any of our upcoming projects.

Mr. Harman, and his staff, are very responsive to any requests you may have and handle each situation promptly. He is very good about adequately staffing each job, communicating, and making sure that his employees uphold Plattin Creek's name and standards. His material supply and staging was always prompt and we were never losing time to waiting on materials.

In all instances thus far, Plattin Creek has been very professional in their coordination and installation, and have installed all of their site utilities exactly according to the plans, specifications, and to the authority having jurisdictions requirements. When they demobilize, there is no question that their scope of work is installed, completed correctly. We have no hesitation in referring Plattin Creek to any developers and/ or contractors that are looking to use Plattin Creek Excavating for their next project including any excavation, sanitary, storm, or water utility project.

Jobs
Watercolor Villas – City of Arnold, Jefferson County Municipalities, Rock Fire Protection District (completed in 2012)
Richardson Ridge – City of Arnold, Jefferson County Municipalities, Rock Fire Protection District (completed in 2014)
Birch Tree Apartments 2 – City of Farmington, Saint Francois County Municipalities (completed in 2014)
